Add Check Payee

Complete the form to add a payee that will be paid by mailing a check from your checking account. If you are setting up a payment from a checking account, the funds will come out of your checking account when the check is processed by the payee. If you are setting up a payment from a Cash Points Global account, funds for the check payment will be debited from your account on the date the payment is sent. The debit will post to your account on the send date as an electronic debit to fund a check that will be sent from a central clearing account.
